Gentlemen:

I am the Akron Urban League Noise Counselor. The experience that I am having with trucks, it is certainly my desire to not see this part of the Noise Control program rescind. I have people that are suffering terribly because of the noise environment that they are living with each and every day.

Really the 80 dB is still a little on the loud side, the 76 dB is better. If my people were not in trouble from the loud diesel noise, I could go along with 80 dB range. But I have people that are ill and almost ready to leave their homes because of the noise, right in their own backyards. Please what ever you do, do not raise or do away with the emission standard.

③

Yours truly,

Mrs. Fannie L. Lett

Fannie L. Lett
Urban Noise Counselor
